Certificate of Analysis

Sample(s) : One sample of Germ Warfare Sanitizing Solution

Received from: Paragon PE Ltd. 24 Westgate, Skelmersdale, Lancashire,
WN8 8AZ

Date received: 11 January 2010 **Date tested:** 14 January 2010

Certificate no: 10A.013.PAR **Certificate date:** 22 January 2010

Sample ref: 10A/013 **Page:** 1 of 2

Analysis required: Skin sensitivity test

Method:

Approximately 0.5ml of Germ Warfare Sanitizing Solution was placed on a sterile lint gauze (2cm x 2cm in size) and taped to the upper arm of each subject. A similar size piece of untreated gauze was also taped to the arm as a negative control. Each subject was asked to leave the gauze in place overnight and was examined the following day, comparing the treated patch with the untreated patch for any evidence of skin irritation. The results are recorded in the table on the following page.

Conclusion:

Germ Warfare Sanitizing Solution does not show any adverse dermatological effect when in contact with human skin for 24 hours.
